DS NATURE

Innovating differently for sustainable tree management

Design and manufacturing of innovative manual pruning poles and systems.

Overview

DS Nature is a French industrial company that designs and manufactures in France innovative manual pruning poles, enabling work from the ground up to 10 metres. DS Nature solutions combine simplicity of use, high precision and durability, in support of responsible tree management. They offer an unmatched stiffness-to-weight ratio, ensuring optimal working comfort and a high level of precision.

Built on the transfer of more than 30 years of know-how, DS Nature develops robust and high-performance solutions dedicated to sustainable tree and forest management, operator safety and wood valorisation through manual pruning, made truly possible.

Target users

Foresters, forest owners, arborists, local authorities, farmers, managers of tree assets, private owners.

Key points

- Work up to 10 m from the ground, without lifting platforms
- Precision and user comfort
- Made in France
- Durable solution with multiple positive impacts
- Guaranteed for 30 years

DS Nature
Less machinery. More meaning. Greater positive impact.
