nr. 412

Fine whetstone with P600 grid to sharpen all Okatsune shears. Sharpening instructions can be found on our website.

L 150 mm
W 25 mm
H 9 mm
60 gr

150 mm

Okatsune whetstone.

THE ART OF SIMPLICITY

Leave out the unnecessary and focus on the essentials. Okatsune tools are made of just a few parts, making the shears lightweight and easy to use and maintain.

Like the Katana swords of the Samurai, Okatsune shears are uniquely forged from the best Izumo Yasugi steel. This steel is characterized by its high hardness, 60.0 to 61.0 on the Rockwell scale, which keeps the shears sharp for a very long time. The flexibility that Okatsune applies, ensures that the blades always align together, even after intensive usage.

Traditionally, the handles are designed in red and white. A combination that is not only easy to spot in the garden, it also symbolises ‘good luck’ in Japan, the land of the rising sun.

岡恒 —— 番号
nr. 307

Lightweight snippers with strong 35 mm blades to cut harder stems as in cuttings, harvesting or thinning.

Cutting hard woody stems.

岡恒 —— 番号
nr. 304

Floral shears with long and pointy 45 mm blades to cut soft stems. The thin blades make a precise and clean cut in densely grown spaces.

Cutting soft stems.

nr. 217

The Okatsune 217 is a true all-rounder and a pleasure to work with, for example for boxwood and yew hedges. This model with medium blade and short handles only weighs 800 grams, perfectly balanced and lightweight. The design is simple, the results are fascinating.

From large hedges to detailed topiary work, Okatsune hedge shears are available in several lengths of blades and handles. All provided with razor-sharp blades that next to giving the optimal accuracy, also do not fall back for the tougher work.

The blades are ground at two angles to make a smooth cut, while little energy is needed. This perfection can be recognized in the ‘singing’ of the shears. Japanese oak handles are well-known to absorb vibrations and give that beautiful feel with the shears.

Hedge shears, short handles, medium blades.

nr. 103

Pruning shears, all-round.

The Okatsune 103 is the medium size and fits most hands. These pruners can handle branches up to 25 mm in diameter and give a smooth and clean cut.

Bypass pruners of Okatsune are available in 3 models, to the size of your hand. The easy and secure latch mechanism can be opened and closed handsfree, just swipe it against your hip. Fold it inwards during use and it will never bother you.
